EDUCATION

CUNY Queens College

Flushing, New York

Bachelor of Arts in Computer Science

January 2024

- Relevant Coursework: Data Structures, Algorithms, Software Engineering, Database Systems, Operating Systems, Internet & Web Technologies(Networking), Object Oriented Programming in C++/Java, Calculus, Linear Algebra, Probability & Statistics

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, JavaScript, C++, HTML, CSS, Swift, PHP

Technologies: Git, MySQL, Oracle, MongoDB, Postman, Spring Boot, Django, pandas, NumPy, AWS, React, Next.js, TailwindCSS, Typescript, Node.js, Prisma, Clerk, Socket.io, ShadcnUI, Microsoft Office (Word, PowerPoint, Excel)

EXPERIENCE

Software Engineer Intern

Feb 2023 – May 2023

Tech Incubator at Queens College(TIQC)

Flushing, NY

- Led Python backend development for E-commerce startup, automating API interactions and database updates in real-time, improving data reliability & increasing revenue by 20%.
- Designed scalable algorithms for diverse data formats, enhancing ETL pipeline efficiency by 30% & operational efficiency by 15%.
- Coordinated QA, unit testing, & integration with supplier APIs alongside 2 interns, reducing data inconsistencies across 5+ relations & improving data integrity by 25%.
- Authored comprehensive documentation & delivered technical solutions, ensuring knowledge transfer & project clarity through presentations to company heads.

Software Engineer Intern

Apr 2023

KLevel1

New York, NY

- Collaborated with a team of 10 engineers using Agile practices to develop MVPs, boosting productivity by 25%.
- Developed a Python AI chatbot using OpenAI GPT models, achieving 90% response accuracy.
- Transformed data sources into vectors for LLM integration, enabling JSON response generation.
- Created PHP text parser for in-depth analysis, managing 10,000+ word texts with **MySQL** integration, prioritizing scalability & documentation.

LEADERSHIP EXPERIENCE

Tech Fellow | *BASTA*

Jan. 2024 – Present

- Engaged in a career prep program designed to support first-generation college students in securing entry-level tech roles, participating in workshops and mentoring sessions.

Google Software Engineering Mentee | *GSWEP*

Jul 2023 – Sep. 2023

- Worked with a Google Software Engineer to deepen understanding of Data Structures and Algorithms, enhancing problem-solving and interview skills through hands-on projects and mock interviews.

TECHNICAL PROJECTS

Health Advisor AI | *Python, Flask, HTML, CSS*

Jun. 2024

- Developed and deployed a functional medical chatbot that responds to a wide range of medical queries.
- Optimized the chatbot's performance to handle multiple concurrent user requests efficiently.
- Implemented backend API endpoints to handle user queries and facilitate real-time interaction with the AI model.

Movie Review App | *Java Spring Boot, React, MongoDB*

Jan. 2024

- Built a full-stack movie review application enabling users to browse and review movies.
- Architected a loosely coupled system to separate client and server code, facilitating independent evolution.
- Implemented backend API using Spring Boot and integrated MongoDB for efficient data storage and retrieval.

CommuniHub | *React, MySQL, TailwindCSS, Next.js 13, Typescript, Socket.io, Prisma*

Aug. 2023 – Sep. 2023

- Designed and built a full-stack communication platform, enabling real-time text, audio, and video interactions.
- Leveraged MySQL and Prisma for efficient data storage and management, ensuring scalability and data integrity.
- Developed features like message management, channel and server administration, and an invite system, delivering a user-friendly experience with responsive UI options.
